

A patented tool for sealing, carrying and storing open sacks of bulk material Exclusively developed and manufactured in Germany!

ECKER'S
Tragfix

**Ecker's Tragfix makes your job a lot easier!
It is a great help:**

- for Do-It-Yourselfers and Professional Craftsmen
plaster, adhesive compounds, mortar and grout, cement-based products, etc.
- for Animal Lovers
cat litter, dog food, bird seed and horse feed, etc.
- for Flower and Vegetable Gardeners
potting and planting soil, bulk seed, fertilizer, peat moss, etc.
- for the Food Industry
flour, salt, rice, etc.
- for Home Use
charcoal, wood pellets, road salt, etc.

Almost everyone is familiar with this problem:

A large sack is opened just to use a small portion of the contents.
Once open, the sack is difficult to carry, the contents are open to the air,
pests get into the sack or it falls over, spilling the contents all over the floor.

But no longer!

...with Tragfix, you can "get a handle" on this problem!

Here are just a few examples of how Tragfix can help you,
whether you're a do-it-yourselfer or a professional:

- for Handymen and Craftsmen (tile adhesives, mortar and grout, plaster, cement-based products, etc. ...)
- for Animal Lovers (dog food, cat litter, bird seed, etc ...)
- for Flower and Vegetable Gardeners (potting and planting soil, bulk seed, peat moss, etc ...)
- for Home and Hobby (charcoal, wood pellets, road salt, etc ...)
- for the Food Industry (flour, sugar, baking powder, etc ...)
